

WHAT HAPPENED IN 1887, THE YEAR WHEN ASTRONOMICAL AND METEOROLOGICAL OBSERVATORY WAS FOUNDED

In 1887, Astronomical and Meteorological Observatory was founded in Belgrade. What that year was actual in our country and in the world, will be presented in about hundred stories-notes, of which 60 are numbered. Material has been collected over the past about twenty years. The notes are divided into astronomical and non-astronomical, and these others on the ones that follow developments in our regions and those from the world. Basically, these are crucial facts, but there are also those from everyday life. At the end of the paper, a list of famous people who were born and died in 1887 was given. The notes are numbered in order to be able to associate with those who speak about the same person. For example, Milan Nedeljkovic, founder of the Observatory, is mentioned in notes No. 3a, 12a, 19, 20, 26, 28, 32, 34, 36, 37, 40, and 41a. They are ordered chronologically. Those that are without an exact date are placed at the ends of the sections.

Key words: Year 1887, History of Astronomy, Astronomical Observatory
