

PARTICIPATION IN THE PROJECT “WORLD SPACE WEEK” IN 2017 AND 2018 YEARS IN PRIMARY SCHOOLS OF KRAGUJEVAC AND NIŠ

In the project "World Space Week" in the period 2017 and 2018, Snežana Veljković has 6 registered activities. Increasing the number of activity numbers increases the number of participants and interest in astronomy. Project teaching is increasingly present in schools and is officially introduced in school year 2018/2019 as a new teaching subject. Linking intersubject competencies and promoting innovative teaching enables the inclusion of younger pupils in independent study and learning through the use of new technologies. The project is becoming more and more actual. Linking more educational institutions with the goal of learning and tracking current historical events in the field of astronomy and related sciences is becoming more and more tempting.

Key words: Project “World Space Week”, Astronomy in education, project teaching, information technologies in teaching
