

ARTHUR EDDINGTON AND HIS BOOK STARS AND ATOMS

In addition to the magazines *Saturn* and *Vasiona*, the Astronomical Society "Ruđer Bošković" has published 25 books and collections of papers since its foundation. Some of these publications present astronomy and other natural and mathematical sciences in a popular way. The majority of the books, however, consists of proceedings from the conferences organized by the Society. Here we present the first book from this edition published before the Second World War and a biography of its author, Arthur Eddington.

Key words: Arthur Eddington, Astronomical Society "Rudjer Bošković", history of sciences
