

# **A CONTRIBUTION TO THE STUDY OF THE BIOGRAPHY OF THE FAMOUS LABOURER AND DISTINGUISHED PROPAGATOR OF ASTRONOMY: PROF. DR RADOVAN DANE DANIĆ**

The life and work of prof. Dr. Radovan Danić, is presented on the basis of the rich memoir presentation from the special issue of "Vasiona (Universe)" (1/1989) and the work of Brana Dimitrijević, which was compared to his character in the parody *Biography of the Famous Labourer*, an anonymous author signed with "V". It was also considered whether the author was Stanislav Vinaver or Miloš Đorić and it was concluded that it is probably Đorić's working version, but it is also possible that the author is a third one.

**Key words:** Colonel prof. Dr. Radovan Rada Danić, Surgery, Astronomy, amateur astronomy, biography, parody
