

STEVO ŠEGAN, ŽARKO MIJAJLOVIĆ

**ON TRANSLATIONS OF RUSSIAN BOOKS IN ASTRONOMY
AND RELATED SCIENCES**

There are not many Russian books translated into Serbian or Serbo-Croatian on astronomy and mathematical sciences in general. In this paper, we present several of these books, most of which were translated from Russian by Stevo Šegan, and some of which he published in electronic form or in print. The translations of these books are mostly little known to the wider, even astronomical, public. Most of these editions have been digitized and are located in the Virtual Library of the Faculty of Mathematics in Belgrade.

Keywords: books on astronomy, translations
