

GRADUATES IN ASTRONOMY FROM THE UNIVERSITY OF BEOGRAD I THE FIRST 44 GRADUATES

Data about the first 44 graduated students of astronomy from the University of Beograd were collected and analyzed. Most of graduates stayed within astronomy, about $\frac{1}{3}$ has gone to secondary schools to teach mathematics, and three worked as computer managers what is impressive for the early period of development of computing sciences in this country. Those who achieved high results either worked abroad or collaborated with foreign scientists. Several of them became distinguished members of the IAU.
