

ALEKSANDAR KUBIČELA

The rich biography of a prolific scientists of the Astronomical Observatory, as was Aleksandar Kubičela, especially marked two facts: first, that he studied Astronomy working at the Observatory in the same time, and second, that his election to the grade of Senior Research Associate, skipping the title of Research Associate, lasted six years, so that he rejected to begin election to the grade of Research Professor! This paper discusses the life and work of Aleksandar Kubičela, and at the end, the bibliography of his works is given.
