

## **JELISAVETA ARSENIJEVIĆ**

This paper is an overview of the life and work of Jelisaveta Arsenijevic, the second woman astronomer at the Observatory, who to Observatory and astronomical science, has dedicated his entire working life. An integral part of this work is its bibliography of 102 works, mostly published in the publications of the Observatory, of which 43 reported even after retirement. It eloquently points out in his own way in its attitude towards science which dealt with the achieved cooperation with its partners, at the Observatory.
