

DJORDJE M. STANOJEVIĆ AND SEISMOLOGY

In reviews of work of naturalist Dj. M. Stanojević, up to now was not mentioned his juvenile impressment with earthquakes. A testimony of this we have in his four texts on seismology. The first three are on popularization. The fourth, professional, where he was coauthor of geologist J. M. Žujović, is related to the Resava earthquake (Svilajinac), which has been on 27th March of 1893. The everlasting trace on consequences of this earthquake he left on his photos.

The work finishes with the possible influences of Stanojević on the work of Jelenko Mihajlović, which became the greatest serbian seismologist.

Key words: Djordje M. Stanojević, Earthquake in Svilajnac, Jovan M. Žujović, Milan Nedeljković, Jelenko Mihailović
