

## COSMOPOETICS OF MUHAMED ABDAGIĆ

Here is considered cosmopoetics of Muhamed Abdagića, little-known poet from Sarajevo, where he published a dozen books, of which two volumes of poetry (*Phoenix*, 1966; *Wandering ship*, 1977), both as a private issue. From them, starting from their presentation in the book, edited by Dr. Predrag Jašović (*From phoenix nest*, Sjenica, 2014), has been selected and presented what is cosmopoetical, which is an important component of his poetic opus. His basic cosmopoetical thought is that the Earth is a comprehensive man's fate, and that he can investigate and use the universe in his own interest, but also to dream at will about it, as he himself did.

**Key words:** Astronomy in culture, cosmopoetics, Muhamed Abdagić
