

Monday, 3.06.

Chairman: L.Č. Popović

10:00-10:30 - Stefanie Komossa-The extremes of AGN variability: outbursts, deep fades, changing-looks, and exceptional spectral states

10:30-11:00 - Jelena Kovačević Dojčinović-Peculiar properties of Fe II lines in spectra of active galactic nuclei

11:00-11:30 - Coffee break

Chairman: M. Dimitrijević

11:30 - 12:00 Nicolina Pop-Reactive collisions between electrons and molecular ions-essential elementary processes in the interstellar media

12:00-12:30 Vincenzo Petrecca-Ensemble power spectral density of quasars in UV/optical bands

13:00-15:00 Lunch break

15:00-18:00 Work on mini-projects
