

Building bridges between climate science and society through a transdisciplinary network

Kopaonik Mt., 10 - 14 September 2024

in organization of the Scientific Society Isaac Newton Belgrade, Institute of Physics Belgrade, Faculty of Geography, University of Belgrade & Astronomical Observatory Belgrade

Scientific rationale

Establishing connections between climate and society necessitates a cooperative strategy that utilizes a transdisciplinary network of experts. The primary objective of this conference is to bring together researchers and professionals from various disciplines to tackle the intricate issues that arise at the crossroads of climate and society. The event will consist of three main sessions: "Transdisciplinary Approaches to Climate and Social Challenges," "Geophysics and Astrophysics: Understanding Climate Interactions," and "Climate and Transport: Shaping a Sustainable Environment." Participants will examine innovative methods and exchange ideas on the successful integration of knowledge across various fields. By engaging in plenary sessions and targeted mini-projects, participants will collaborate to create extensive resolutions that tackle urgent environmental concerns. This will lead to the production of joint publications in important scientific journals.
